

Home control, family protection, and added freedom.

Alpine Communications offers home automation solutions you control from any smart mobile device or Internet connection. Especially comforting for parents, it lets you unlock a door to let children in and secures the door behind them; or you can simply receive an email when they arrive home from school.

Save money through energy efficiency, monitor your vacation home, or even be alerted if your elderly family member hasn't moved throughout the house. Enjoy the peace of mind of true home monitoring.

Protection for your family.
Peace of mind for you.

Thanks to **Alpine Communications**, having a secure home is now affordable.

Using your internet connection or smart mobile device, you can:

- View live surveillance video feed
- Receive alarm alerts
- Control security including remote door locks
- Monitor motion detection
- Manage your energy usage
- Control your thermostat remotely
- Monitor carbon monoxide
- Detect water leaks

TOTAL CONTROL OF YOUR HOME.

In the palm of your hand.

Life. Technology.
Together, we make it work.

Sensors, devices, locks, lighting, energy management, and more...

Smart Locks

Locks that can be programmed to activate lights and adjust the thermostat.

Keychain Fobs

Multi functional, sleek and tough, this smart key fob provides control over motion sensors, thermostats, lighting and much more.

Door/Window Sensors

Sensors are slim and small to not distract from your home's cosmetic appeal; sensitive, reliable contacts avoid false alarms.

Indoor Power Outlets

Control a lamp, appliance, or other electrical device with a simple on/off switch on your smart phone; just plug into an outlet.

Outdoor Power Outlets

Same functionality as indoor outlet designed with more durability; unit must remain dry from weather and water contact.

Motion Sensors

Device detects motion and can be easily programmed to send notifications via text, email or text to speech.

Smart Thermostat

Programmable thermostat designed for monitoring and controlling most heating and air conditioning units. Can be accessed remotely from PC, tablet or smartphone.

Home Energy Monitoring Kit

A Low-cost monitoring solution to report wattage and kilowatt usage; easy to install and safe to use.

Multi-Sensor

Detects motion, relays temperature, lighting, and humidity conditions all in one unit.

Trust the expertise of Alpine Communications

Water Sensor

Designed for areas prone to water leak, flooding, or other fluid overflows. If probes and prongs detect liquid, a notification is sent out via text, email, or text to voice.

Loud Siren/Flashing Red Light

Low cost home security device that triggers extreme sound and light to deter intruders.

Quality IP Camera

High-resolution video camera captures video clips when an event is triggered (i.e. doors opening, motion detected and window or door sensor activity).

Snapshot Camera

High-resolution video camera takes snapshots when an event is triggered (i.e. doors opening, motion detected and window or door sensor activity).

Commercial Quality Camera

This 2 megapixel indoor/outdoor commercial quality camera provides complete surveillance, inside or outside.
