

# Alert Law Enforcement Quickly and Silently with **Panic Button Service**

**You need to provide a safe environment for your employees and customers in order for your business to thrive. Unfortunately, workplace violence is a serious threat.** The National Safety Council says 2 million American workers report having been victims of workplace violence every year. Certain industries—including health care, service providers, and education—are more prone to workplace violence than others. But make no mistake. It can happen anywhere.

**Take action now to help prevent or minimize workplace violence by adding Panic Button Service from Alpine Communications to your security measures.** Panic Button Service enables you to instantly alert law enforcement when faced with an armed intruder, an angry customer or ex-employee, or any other potentially harmful event. You don't need to pick up a phone or say a single word.

When you subscribe to Panic Button Service, Alpine Communications will install a hidden button underneath a counter or other discreet place. When pressed, this button will instantly alert the central monitoring station to dispatch the police immediately to your location without calling the premises first. No alarm sound will be heard.

**Is Panic Button Service right for your business? Ask yourself these questions, then talk with us at Alpine Communications for more assistance.**

- Is my place of business open to the public?
- Do I have employees who work alone or in isolated parts of a large building?
- Are cash, prescription drugs, or other valuable items easily accessible by someone entering the business?
- Have I heard of increased crime in my business area?
- Would sounding an audible alarm escalate an already dangerous situation?

For less than one dollar per day, Panic Button Service provides priceless peace of mind to you and your employees by equipping your business with the ability to get help there fast.
